

**BLADE REMOVAL** 

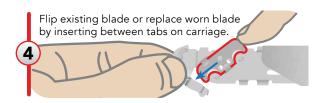

**CARRIAGE LOCK** 

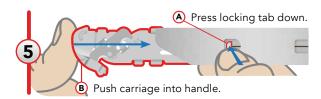

# **Blade Replacement and Locking System**

## **Cleaning Your KS Series Safety Cutter**

DISASSEMBLE CUTTER AND REMOVE BLADE

Follow blade removal steps #1–3 at left.

Then, press locking tab down once again to pull carriage all the way out of the handle.

### **CLEAN HANDLE AND CARRIAGE SEPARATELY**

Manually wipe all areas and surfaces on handle and carriage.

Use towel, brush or other tool to remove debris from hidden or interior sections.

#### **SANITIZE IF NEEDED FOR YOUR APPLICATION**

Create solution of sodium hypochlorite (100ppm) or approved solution for your industry.

4

Immerse carriage and handle separately to sanitize all areas and surfaces. Rinse well under running water if required per solution used.

### ONCE CLEAN AND DRY, REASSEMBLE CUTTER

Push carriage into handle until locking tab clicks once.

Follow carriage lock steps #5-7 at left.
